WORK EXPERIENCE

ADMINISTRATION EXECUTIVE   June 2023 - Present
GWMI GROUP | Geelong, Australia

- Leveraged Excel's advanced capabilities, incorporating Charts and Graphs, Pivot tables, and Macros, to optimize scheduling and manage 50 daily inspection bookings.
- Produced detailed reports for over 800 inspections in the past month, highlighting discrepancies and playing a pivotal role in a 15% reduction in noncompliance incidents.
- Spearheaded efforts to streamline the report generation process, attaining an average turnaround time of under 24 hours for delivering inspection reports to clients.

LEAD DATA SCIENTIST   November 2022 – May 2023
CHAMELEON – Deakin University | Geelong, Australia

- Directed the EV Charging Stations Forecasting Project, achieving a 90% accuracy rate in predicting demand within the timeframe.
- Formulated a detailed Use Case for the Melbourne City Council, highlighting iconic landmarks to boost growth in local food outlets, anticipating a 20% increase in foot traffic.
- Prepared comprehensive data gathering and analysis on 20+ datasets, producing impactful visualizations that played a pivotal role in strategic decision-making.
- Implemented Agile Methodology with Jira and Trello, leading to a 25% reduction in project timeline, and fostering collaborative efforts with the design team to showcase data findings.

ERP APPLICATION SPECIALIST   July 2018 – July 2021
Thirdware Solutions – Tech Mahindra | Mumbai, India

- Consulted with over 15 Fortune 500 companies, resulting in a 10% increase in the adoption of QAD EDI E-commerce, enhancing proficiency in data-driven decision-making.
- Designed and implemented interactive dashboards within ERP environments, providing real-time visualizations and KPI tracking.
- Executed Financial EDI projects for JP Morgan Chase & Lloyds Bank, with a 50% improvement in transaction efficiency and accuracy.
- Led MFG/PRO EDI Implementation projects, managing the system maintenance & enhancement, and technical support for a portfolio of projects.
- Managed end-to-end Progress 4GL development, reducing post-implementation bugs by 20% and maintaining elevated code quality standards.

PROJECTS

Thesis Project: Early Detection of Gait Disorders   Credentials

- Researched innovative approaches leveraging cutting-edge sensor technologies to enable the early detection and in-depth analysis of gait disorders in the elderly population.
- Employed surveys, medical records web scraping, and exploration of diverse datasets for a comprehensive analysis of gait disorders.
- Performed in-depth literature review of over 50 research papers, employing literature management tools like Zotero to organize and synthesize research materials.
- Incorporated Matplotlib, Seaborn, and Plotly for data visualization, presenting detailed gait disorder findings to stakeholders, and fostering insightful discussions.

Transaction and Customer Data Analysis   Credentials

- Examined and cleaned data for accuracy, leveraging Python and SQL, to ensure dependable subsequent analysis.
- Created compelling visualizations using Tableau and synthesized findings for effective communication of data insights.
- Identified customer segments using analytical techniques, deriving actionable commercial recommendations through data analysis, contributing to strategic decision-making
